

# DEPARTMENT OF SCIENCE COURSE OUTLINE – WINTER 2020

# CH1050 (A3): INTRODUCTORY UNIVERSITY CHEMISTRY II – 3.8 (3-1-1.5) 82.5 HOURS OVER 15 WEEKS

INSTRUCTOR: Les Rawluk PHONE: 780 539 2738

OFFICE: J214 E-MAIL: lrawluk@gprc.ab.ca

OFFICE HOURS: Monday + Wednesday 10:00 – 11:30; Tuesday + Thursday 9:00 – 9:45

CALENDAR DESCRIPTION: Chemical kinetics and equilibria, acid-base and solubility equilibria,

electrochemistry and thermodynamics. Restricted to Engineering students.

PREREQUISITE: CH1030

**REQUIRED TEXT/RESOURCE MATERIALS:** *Chemical Principles* by Steven S. Zumdahl and Donald J. DeCoste, 8<sup>th</sup> edition, Brooks/Cole, Cengage Learning, 2016. Required Lab manual is Introductory University Chemistry II (Chem 102 and 105), published by the University of Alberta, 2019/2020 edition.

**DELIVERY MODE(S):** Lecture style presentation of material followed by practice problems/discussion in seminar. Laboratory provides hands-on experience.

**COURSE OBJECTIVES:** Students are enabled to strengthen their understanding of basic chemical principles pertaining to rate, spontaneity, extent, and direction of various chemical reactions. Critically thinking about these concepts as they apply to chemical problems will strengthen the student's knowledge of chemical topics.

**LEARNING OUTCOMES:** Upon successful completion of this course, students will be able to:

- Apply the principles of chemical kinetics to find rates of reactions, and explore mechanisms and activation energy of simple chemical changes.
- Use the principles of equilibrium to interpret behaviors of weak electrolytes, buffer solutions, and solubility of sparingly soluble salts.
- Apply the above principles to evaluate the pH of acids of different strengths.
- Understand and use the principles of oxidation-reduction and electrochemistry including Voltaic and electrolytic cells.
- Use thermodynamic concepts to explain spontaneity in chemical reactions, and the role of thermodynamic functions in describing equilibrium systems.
- Use laboratory techniques related to volumetric analysis and simple instrumentation including an introduction to spectroscopy.

TRANSFERABILITY: UA, UC, UL, AU, AF, CU, CUC, KUC

\*Warning: Although we strive to make the transferability information in this document up-to-date and accurate, the student has the final responsibility for ensuring the transferability of this course to Alberta Colleges and Universities. Please consult the Alberta Transfer Guide for more information. You may check to ensure the transferability of this course at the Alberta Transfer Guide main page <a href="http://www.transferalberta.ca">http://www.transferalberta.ca</a> or, if you do not want to navigate through few links, at <a href="http://alis.alberta.ca/ps/tsp/ta/tbi/onlinesearch.html?SearchMOde=S&step=2">http://alis.alberta.ca/ps/tsp/ta/tbi/onlinesearch.html?SearchMOde=S&step=2</a>

\*\* Grade of D or D+ may not be acceptable for transfer to other post-secondary institutions.

Students are cautioned that it is their responsibility to contact the receiving institutions to ensure transferability.

50%

Quizzes	5%
Lab Reports	10%
Lab Exam	10%
Midterm Exam	25%
	Lab Reports Lab Exam

Final Exam

#### **GRADING CRITERIA:**

Please not that most universities will not accept your course for transfer credit IF your grade is less than C-.

Alpha Grade	4-point	Percentage	Alpha	4-point	Percentage
	Equivalent	Guidelines	Grade	Equivalent	Guidelines
A+	4.0	94-100	C+	2.3	68-71
Α	4.0	89-93	С	2.0	64-67
A-	3.7	84-88	C-	1.7	60-63
B+	3.3	80-83	D+	1.3	55-59
В	3.0	76-79	D	1.0	50-54
B-	2.7	72-75	F	0.0	00-49

#### **COURSE SCHEDULE/TENTATIVE TIMELINE:**

Chemical Kinetics (Chapter 15; Pages 600 – 647) 6 – 8 hours

Reaction Rates

Rate laws

Determining rate law form

Integrated rate law

Arrhenius equation

Reaction mechanisms

Steady-State approximation

Catalysis

#### Chemical Equilibrium (Chapter 6; Pages 169 – 196) 4 – 6 hours

Equilibrium condition

Mass-action expression and the equilibrium constant

Heterogeneous equilibria

Applications of the equilibrium constant

LeChatelier's Principle

#### Acids and Bases (Chapters 7 & 8; Pages 197 – 277) 9 – 11 hours

The nature of acids and bases

Acid strength and the pH scale

Calculating pH of strong/weak acids

Bases

Salts

Mixtures of weak acids and bases

Polyprotic acids

Effect of structure upon acid strength

Common ion effect

**Buffer systems** 

Acid/base titrations

Acid/base indicators

## Solubility Equilibria (Chapter 8; Pages 278 – 298) 3 – 5 hours

Slightly soluble salts

Complex ion equilibria

### Thermochemistry (Chapter 9; Pages 299 - 343) 3 - 5 hours

Types of energy; work and heat

First Law of Thermodynamics

Enthalpy; endothermic and exothermic processes

Thermodynamics of an ideal gas

Calorimetry

Hess's Law

Standard enthalpy of formation

Thermodynamics (Chapter 10; Pages 344 – 396) 3 –5 hours
Entropy and The Second Law of Thermodynamics
Entropy of the system and the surroundings
Free Energy and Equilibrium

Electrochemistry (Chapter 11; Pages 397 – 435) 3 – 5 hours

Redox reactions and standard electrode potentials
Galvanic cells and spontaneous redox reactions
Cell potential, electrical work, and free energy
Dependence on concentration – the Nernst Equation
Batteries
Electrolytic cells

**STUDENT RESPONSIBILITIES:** A student must pass the laboratory portion to receive a passing grade in this course.

No electronic equipment capable of connecting online is accessible during exams.

Electronic distribution of assignments occurs on a roughly weekly basis. Complete solutions will be available a short while later. Solutions to quizzes will be posted a few days after the quiz is completed.

Attendance to all lectures and seminars is strongly recommended. Laboratory attendance to each specific experiment is compulsory. Official documentation is required for all excused absences. Students must maintain an overall average of 50% or better to pass this course. You are encouraged to participate in class discussions and ask questions. Help is available outside the classroom.

#### STATEMENT ON PLAGIARISM AND CHEATING:

Cheating and plagiarism will not be tolerated and there will be penalties. For a more precise definition of plagiarism and its consequences, refer to the Student Conduct section of the College Calendar at <a href="http://www.gprc.ab.ca/programs/calendar/">http://www.gprc.ab.ca/programs/calendar/</a> or the College Policy on Student Misconduct: Plagiarism and Cheating at <a href="https://www.gprc.ab.ca/about/administration/policies">https://www.gprc.ab.ca/about/administration/policies</a>

\*\*Note: all Academic and Administrative policies are available on the same page.
