

SCIENCE DEPARTMENT

COURSE OUTLINE – Fall 2026

CS 3220: Introduction to Artificial Intelligence 3 (3-0-3)

90 Hours for 15 Weeks

Northwestern Polytechnic acknowledges that our campuses are located on Treaty 8 territory, the ancestral and present-day home to many diverse First Nations, Metis, and Inuit people. We are grateful to work, live and learn on the traditional territory of Duncan's First Nation, Horse Lake First Nation and Sturgeon Lake Cree Nation, who are the original caretakers of this land.

We acknowledge the history of this land, and we are thankful for the opportunity to walk together in friendship, where we will encourage and promote positive change for present and future generations.

INSTRUCTOR:	Dr. Hanna Yehoshyna	PHONE:	780-539-2074
OFFICE:	C-302	E-MAIL:	hyehoshyna@nwpolytech.ca
OFFICE HOURS:	appointment by email		

CALENDAR DESCRIPTION:

This course introduces the underlying concepts and essential techniques of Artificial Intelligence (AI). Topics cover core concepts in AI, such as intelligent agents, heuristic and adversarial search, game playing, knowledge representation and reasoning, making decisions, and machine learning fundamentals. The techniques and technologies mastered in this course will provide the foundational knowledge to design and implement various AI-based solutions to solve real-world problems across practice areas.

PREREQUISITE(S):

- CS2010 - Practical Programming Methodology (3)
- MA1200 - Linear Algebra I (3)
- ST1510 - Introduction to Applied Statistics I (3)

COREQUISITE: None

NORTHWESTERN POLYTECHNIC

REQUIRED TEXT/RESOURCE MATERIALS:

The text for this course is:

- *Artificial Intelligence: A Modern Approach, 4th edition. Stuart Russell, Peter Norvig, Pearson, 2021, ISBN 978-0134610993*

DELIVERY MODE(S):

In Person. This course is delivered in person at the Grande Prairie campus.

This course includes 3-hours of lecture per week and a 3-hour lab per week

Lecture:	A2	G112	Tue. 10:00-11:20 Thu. 10:00-11:20
----------	----	------	--------------------------------------

Labs:	L1	G112	Fri. 8:30-14:20
-------	----	------	-----------------

LEARNING OUTCOMES:

On the successful completion of this course, students will be able to

- understand and explain goals and principles of AI, its relationship to other fields, and the problem domains it is suitable for;
- understand and explain core concepts in AI, such as intelligent agents, heuristic and adversarial search, game playing, knowledge representation and reasoning, making decisions;
- identify and describe the characteristics, and formulate an efficient problem space for a given problem using initial and goal states, and operators;
- identify and apply basic models and algorithms used in artificial intelligence for a given problem;
- apply, design and implement different AI techniques and AI-based solution to solve real-world problems;
- work effectively in teams on AI projects.

TRANSFERABILITY:

Please consult the Alberta Transfer Guide for more information. You may check to ensure the transferability of this course at the Alberta Transfer Guide main page <http://www.transferalberta.alberta.ca>.

**** Grade of D or D+ may not be acceptable for transfer to other post-secondary institutions. Students are cautioned that it is their responsibility to contact the receiving institutions to ensure transferability.**

Your final grade will be determined in the following manner:

<i>Assignments</i>	<i>35%</i>
<i>Quizzes</i>	<i>10%</i>
<i>Midterm Exam</i>	<i>25%</i>
<i>Final Exam</i>	<i>30%</i>

Course Evaluation Practices:

- all assignments must be completed as individual efforts unless the Instructor states otherwise;
- quizzes and tests must be written as scheduled by the Instructor;
- a student must average at least 50% on the tests combined in order to receive credit for this course;
- a student must average at least 50% on the assignments in order to receive credit for this course.

GRADING CRITERIA

Please note that most universities will not accept your course for transfer credit **IF** your grade is less than C-.

Alpha Grade	4-point Equivalent	Percentage Guidelines		Alpha Grade	4-point Equivalent	Percentage Guidelines
A+	4.0	95-100		C+	2.3	67-69
A	4.0	85-94		C	2.0	63-66
A-	3.7	80-84		C-	1.7	60-62
B+	3.3	77-79		D+	1.3	55-59
B	3.0	73-76		D	1.0	50-54
B-	2.7	70-72		F	0.0	00-49

COURSE SCHEDULE/TENTATIVE TIMELINE:

Weeks	Topics
1	Introduction to AI
2	Intelligent agents and environments. Problem-solving agents and basic search
3	Uninformed search strategies
4	Informed (heuristic) search strategies

Weeks	Topics
5	Informed (heuristic) search strategies (cont.)
6	Constraint satisfaction problems
7	Adversarial search and games
8	Local agents
9	Logical Agents
10	Midterm
11	First-Order Logic
12	Knowledge representation. Reasoning and making decisions
13	Intro to Machine Learning
14	Intro to Deep Learning and Neural Networks
15	Final Exam

STUDENT RESPONSIBILITIES:

- Students are responsible for all material taught, discussed, assigned or presented by the Instructor. It is the student's responsibility to obtain any missed material covered during classes.
- Students take the two examinations at the date and time announced by the Instructor and/or Student Services. If the midterm is missed due to illness the weight will be put on the final. If the final is missed due to illness it will be deferred.
- Documented illness is the only valid excuse for missing an exam. An original medical note will be required in both cases. A grade of 0 may be assigned for any missed exam.
- Students must be prepared for class with the proper books and assignments, and having read and/or completed all assigned material.
- Students are supposed to complete assignments on or before the due the time and date announced by the Instructor
- Students are not permitted to work together on assignments or exams (unless otherwise instructed by the Instructor).

STATEMENT ON ACADEMIC MISCONDUCT:

Academic Misconduct will not be tolerated. For a more precise definition of academic misconduct and its consequences, refer to the Student Rights and Responsibilities policy available at <https://www.nwpolytech.ca/about/polytechnic-leadership/policies-directory>.

****Note:** all Academic and Administrative policies are available on the same page.

ADDITIONAL INFORMATION:

Attendance

Students are expected to attend at least 75% of all scheduled classes, arrive on time, and remain for the duration of the scheduled class (unless advance permission is obtained from the instructor). Students may be refused permission to write the final examination on the advice of the instructor. This usually happens when absences are more than 30% of all scheduled classes, or if significant assessments like assignments, quizzes, tests, and/or exam(s) are not completed; see [Examination Policy](#) and Debarred from Examinations.

Time Management

Adopting and adhering to effective learning habits in this course will likely take up a great deal of time so plan your schedule accordingly. See *Course Schedule/Tentative Timeline* section above. Course materials and announcements will be available on myClass, Connect, and NWP Webmail. Students are responsible for checking all three websites regularly: 2-3 times per week.

Cell Phones, Recording and Photos

The use of cell phones during class time is unprofessional and distracting to the instructor as well as fellow students. Cell phones must be turned off or set to silent and placed out of sight during class time. Recording lectures or taking photos in class is prohibited unless advance permission is obtained from the instructor and any guest presenter(s). In the event permission is granted, such recordings may only be used for individual study, and may not be reproduced, transferred, distributed, or displayed in any public manner. Any images taken without instructor consent will need to be deleted immediately.

Email

Students may contact the instructor by NWP Webmail. Webmail will be answered within 3 business days (excluding weekends and holidays). Webmail correspondence must be sent to your instructor from your NWP Webmail account. Webmail should be professionally formatted with correct spelling and grammar. Webmail must include a subject line and reference to the course code and material(s) and/or textbook pages, etc.

Copyright

NWP respects Canadian and International laws and agreements with respect to the use of copyright materials. It is the responsibility of the individual using copyrighted materials to ensure said use is compliant with Canadian law, the Use of Copyright Materials Policy, and the Copyright Practices Guide for NWP instructors and Staff.
