BL115 - INTRODUCTION TO COMPUTERS

TEXT: Structure Basic, Richard H. Jones; Allyn and Bacon, Inc. 1985

SUPPLEMENTAL TEXT: APPLEWORKS MADE EASY, Carol Boggs Matthews; Osborne McGraw-Hill Ryerson Ltd.

PREREQUISITE: Nil.

COURSE DESCRIPTION: This course is intended to introduce students to the role of computers in the workplace. Lectures and labs will focus upon the application of popular commercial software in the solving of business problems. Participants will be exposed to a variety of computer hardware systems. A high level language will also be introduced.

COURSE OBJECTIVES: With the explosion of computer usage that's occurring today, an essential outcome of any post-secondary education is the need to ensure that students become computer literate. Computer literacy means "knowing computers". It means knowing what they are, what one can and cannot do, how they are programmed to work, and how their use can improve the business activities of a firm. This course is a first step in the development of a "computer literate" student.

In order to meet the objectives stated above, students will be expected to: 1) become familiar with an integrated word processing, data base, spread sheet software package; and 2) begin to understand how to use a high level programming language.

BB.113 - INTRODUCTION TO COMPUTERS

GRADING: Course credit will be determined on the following basis:

Midterm Exam	25%
Final Exam	35%
Major Assignments	20%
Two Article Reviews	10%
Class Participation	10%
	100%

Conversion of Percentages to the 9-point system will be as follows:

90 - 100%	9
80 - 89%	8
73 - 79%	7
66 - 72%	6
57 - 65%	5
50 - 56%	4
45 - 49%	3
26 - 44%	2
0 - 25%	1

COURSE
CONTENT:

SECTION ONE

This section of the course will acquaint the student with the APPLEWORKS integrated software program. A short discussion about computers is followed by the introduction to the Data Base, Word Processor and Spreadsheet software.

SECTION TWO

This section introduces students to the high level language BASIC. ProDOS, DOS 3.3, or CP/M operating systems will be explained also.
