GRANDE PRAIRIE REGIONAL COLLEGE
DEPARTMENT OF BUSINESS ADMINISTRATION
COURSE OUTLINE

BA 206 - STATISTICS FOR BUSINESS

Instructor: John El-Nahhas
Office: C 115
Phone: 539-2911 Ext. 2815
Office Hours: Monday & Wednesday 9:00 a.m. to 1:00 p.m.

TEXT: W. Mendenhall (et al.). Statistics for Management
                     and Economics. Boston: Duxbury Press, 1986.

                     Workbook/Study Guide

PREREQUISITE: BA 105

COURSE   An introduction to the use of random variables, the
DESCRIPTION: binomial and normal probability distributions,
                estimation, tests of hypothesis and small sample
                theory in statistics. Practical applications will be
                emphasized in the course.

COURSE CONTENT:

		Text Chapter(s)
1.	Introduction	2, 3
2.	Random Variables	4
3.	Binomial Distributons	5
4.	Normal Probability Distribution	6, 7
5.	Large Sample Inferences	8
6.	Small Sample Inferences	9

EVALUATION: Tests 4 x 15%   60%
                Final Exam   30%
                Lab Work/Assignments   10%
                                      100%

FALL 1986
