

GRANDE PRAIRIE REGIONAL COLLEGE  
DEPARTMENT OF BUSINESS ADMINISTRATION  
COURSE OUTLINE

1988-89

BA 213 - COST ACCOUNTING I

- TEXT: Managerial Accounting; Jack L. Smith, Robert M. Keith and William L. Stephens; McGraw-Hill, 1988
- ON RESERVE: Solutions Manual to accompany the text.  
Management Accounting; Corine T. Norgaard; Prentice-Hall Inc., Englewood Cliffs, N.J., 1985 WITH SOLUTIONS MANUAL  
(For those students who wish additional practice solving questions from a different source.)
- PREREQUISITE: BA111/112 Introductory Accounting
- COURSE DESCRIPTION: First of two part in-depth course examining the concepts of cost and managerial accounting. Major topics to be covered include: cost-volume profit analysis, relevant costs and short-term decision making, financial budgeting, capital budgeting, responsibility accounting and divisional performance measurement, standard costing and variance analysis and product costing.
- COURSE OBJECTIVES: To introduce the student to managerial accounting - its techniques and applications. The student will learn specific tools to plan and control businesses, make decisions and cost products. The student will learn the application of these tools in real-life situations through the use of case studies. Finally, the student will be introduced to the computer as a tool for business by solving a number of problems on the machine.
