Department of Science

Course Outline

Fall 2009-2010

BI 1070

Introduction to Cell Biology

Instructor:

Philip Johnson B.Sc., M.Sc., Ph.D., M.S.P.H.

Office: J224

Phone: 539 2863

E-mail: pjohnson@gprc.ab.ca

- Course Description:** This course provides an introduction to cell structure and function. Major topics include the molecules and structures that comprise prokaryotic and eukaryotic cells, the mechanisms by which energy is harvested and used by cells, how cells reproduce, and how information is stored and used within a cell via the processes of DNA replication, transcription and translation.
- Course Goals:** Successful completion of this course will enable students to:
1. Apply knowledge of the structure of molecules and cells to explain how energy, matter, and information moves within and between cells of eukaryotes and prokaryotes.
 2. Apply knowledge of laboratory skills and techniques to generate data and conduct analyses of that data.
 3. Demonstrate written communication skills in laboratory reports.
- Text books:** “Biology” by Campbell and Reece (8th edition)
Benjamin Cummings Publishing Company
This text is available at G.P.R.C. Bookstore
The 6th Edition (2002) or 7th Edition (2005) of this text are also acceptable but there are differences between the material covered by the various editions.
- Biology 1070 Laboratory Manual
G.P.R.C. / University of Alberta
You must purchase the latest version of this Lab. Manual. It will be available from G.P.R.C. Bookstore.
- Student Workbook
Benjamin Cummings Publishing Company
This book is useful but IS NOT a required text. Limited numbers are available at G.P.R.C. Bookstore
- Supplements:** Copies of the Lecture Powerpoint presentations will be available as handouts. They can be downloaded from the BI 1070 Blackboard page.
- Mastering Biology Web site
Students can gain access to this resource using the Student Access Kit provided with the text book. The Study Area of this site provides many useful tools including animations, videos and practice quizzes.
- Office Hours:** Times that I am available to students will be posted on my office door, although any student is welcome to drop in to my office at other times. Students may also make appointments at times that are convenient to both of us.

BI 1070
 TOPIC OUTLINE
 2008-2009

<u>TOPICS</u>	<u>Required Text Readings (pages)</u>		
	<u>8th edition</u>	<u>7th edition</u>	<u>6th edition</u>
Introduction to BI 1070			
Chemistry review	32-42, 58-89	34-43, 60-89	31-37, 62-84
Classification of living organisms	89, 98-9, 463-5, 516-7, 551-3, 556-9, 565-570	89, 98-9, 449, 523-6, 529-31, 534-7, 541-4	112-5, 522-3, 526-8, 532-4, 535-9
Overview of cell structure and membranes	95-97, 125-138	96, 124-138	112-3, 138- 152, 68-84
Cell walls and extracellular matrix	118-121, 557-9	118-121, 535-7	132-3, 528-9, 67-8
Cellular compartments	98-111, 558	98-111, 536	112-126
Cytoskeleton and molecular motors	112-118, 558-9	112-118, 536-8	126-32, 529-30
Cell Communication & Signaling	206-222	201-214	197-210
Biological Order and Energy	142-59	141-57	87-100, 156-9, 31-7
Chloroplasts and Photosynthesis	185-194	181-190	124-5, 176-8
Photosynthesis - Light Reactions	194-8, 163-4	190-3, 161-2	179-91
Photosynthesis – Calvin Cycle, photorespiration	198-203	193-8	191-4
Glycolysis & anaerobic metabolism	162-9, 177-9	160-7, 174-6	161-3, 170-2
Citric Acid Cycle (Kreb's Cycle)	170-7	168-74	161-7
Electron Transport Systems	180-182	176-8	167-8, 172-3
Other energy sources and bioremediation	572-3, 1260-1		532-4
Bacterial cell growth	236-7, 561-4, 559-61	226-7, 346-51, 537-8	223-4, 341-5, 531-2
Eucaryotic cell division and the cell cycle	228-43	218-33	216-22, 224-29
DNA chemistry and transfer in prokaryotes	305-10	293-8	287-92, 341-45, 80-84
DNA packaging in eukaryotes	320-23	359-63	354-56

<u>TOPICS</u> (continued)	<u>Required Text Readings (pages)</u>		
	<u>8th edition</u>	<u>7th edition</u>	<u>6th edition</u>
DNA replication	311-19	299-307	292-99
Genes, mRNA and proteins	325-331	309-14	303-9
Transcription and RNA processing	331-335	315-9	309-13
Procaryotic regulation of transcription	351-6	352-6	347-51
Translation	337-344	320-8	313-321
Viruses, phages, viroids, prions	381-94	334-46	328-40, 342-3
