Course Description

This course will focus on learning about interprocess communication (IPC) mechanisms and how they can be used to write network applications. We will focus primarily on those available in the Windows family of operating systems. In the process of learning about these IPC mechanisms, we will take a more in-depth look at some of the most popular protocols in use in LANS and WANS.

Text

Network Programming in Windows NT
by Alok K. Sinha

Evaluation

Assignments	35%
Midterm Exam and 2 Quizzes	30%
Final Exam	35%

There is a 30% penalty for late (less than 1 week) assignments. Assignments which are more than 1 week late will not be accepted.
