

**Operating Systems
CT 3790
Course outline**

OCT 05 1998

Instructor : Franco Carlacci
Office : C422
Phone : (539) - 2091
Prerequisite : cs1150
URL : <http://192.139.30.110/~francoc/> or <http://172.16.8.3/>

Course Content

In this course the student will be introduced to concepts and features commonly found in operating systems. Class discussions will focus on traditional operating system topics (processes, memory management, file systems and input/output) as well as distributed operating systems topics (communications, synchronization, and distributed file systems). A variety of operating systems (MS-DOS, UNIX, Windows NT, OS/2, VMS, etc) will be studied as examples

Course Material and Text

The text to be used in this course is : *Operating Systems Concepts - Fifth Edition* by Abraham Silberschatz and Peter Baer Galvin

Marking Scheme

assignments : 30%
Quizzes : 15%
midterm : 20%
Final : 35%
