

GRANDE PRAIRIE REGIONAL COLLEGE
DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCE
EC 381 - MICROECONOMIC ANALYSIS I

COURSE OUTLINE

INSTRUCTOR:	Ebby Aslani	FALL, 1991
OFFICE:	C 423	
CLASSES:		
OFFICE HOURS:	Mon, Wed, Fri, 11:00 - 12:00 or by appointment	
PHONE:	539 - 2973	

I. COURSE OBJECTIVE

The course deals with microeconomic theory at an intermediate level. It has four basic goals.

1. To expand knowledge and understanding of microeconomic tools beyond the elementary level.
2. To enhance the understanding of the theory of the consumer, and the theories of production, cost, price, output and input determination under various market structures.
3. To use mathematical techniques, mainly calculus, as a method of teaching microeconomic theory, in addition to the verbal and diagrammatical methods.
4. To develop an ability to use the theory to solve theoretical problems and to apply it to "real world" phenomena.

* * I would like to emphasize that this is a course in economics, not in mathematics. While the understanding of the mathematics and its economic interpretation will be reflected in the final grades of students of this course, the student will be tested mainly on their understanding and application of microeconomic theory. This is especially true for the final examination. However, anyone who has already completed EC 201, EC 202 and at least MA 202 or MA 203, and is willing to work hard enough to

enhance his/her economic and mathematical skills is welcome to attend this course, and can expect to complete it successfully.

Remember that, by its nature, this course is a theoretical one. Most of the class time is required to enable the students to master microeconomic tools and theory. Applications are to be found mainly in the textbooks, in assignments and in exams. The knowledge which will be acquired in this course will be useful when taking other economic courses such as industrial organization, international trade, labour economics, urban economics etc., and business courses in finance, marketing, cost accounting etc.

II. TEXT BOOK:

Principal Text: Microeconomics, Seventh Edition, Edwin Mansfield, W.W. Norton and Company, New York, 1991.

Microeconomic Problems, Seventh Edition, Edwin Mansfield, W.W. Norton and Company, New York, 1991.

ADDITIONAL REFERENCES:

Microeconomics and Behaviour, R.H. Frank, McGraw-Hill, Inc. 1991.

Microeconomics, Theory & Applications, G.S. Maddala & E. Miller, McGraw Hill, Inc. 1989.

Microeconomics, D. Salvatore, Harper Collins Publishers, 1991.

Intermediate Microeconomics, Second Edition, Hal R. Varian, W.W. Norton, New York, 1990.

III. MARK DISTRIBUTION:

Two Assignments	(10% each)	20%
Two Multiple Choice Exam	(5% each)	10%
Mid-Term Exam		30%
<u>Final Exam</u>		<u>40%</u>
Total		100%

IV. GRADE DETERMINATION:

1. After each assignment or examination is graded, I shall calculate the average grade for the class. Usually it will be "too" high for the first assignment, then it will be low because of difficulty of the questions and/or the high standard required while grading. When this happens, I shall calculate an adjustment factor, Y, according to the formula $Y = (\text{"desired" average grade}) / (\text{actual average grade})$, where for a normal class, the "desired" average grade will be equal to 68. Thus $Y \geq 1$. Then each individual's grade will be adjusted by multiplying the actual grade on the assignment (or examinations) by the adjusted factor, Y. This adjusted grade is registered in the class records. [If the average grade for the class is above the "desired average grade" no adjustment will take place].
2. All adjusted grades are first recorded as percentages. After the final exam, the weighted average (.10 each assignment, .5 each multiple choice exam, .30 mid-term exam and, .40 final exam) of the percentages will be converted to the college nine-point system according to the following table:

9 = 90 - 100%	4 = 50 - 56%
8 = 80 - 89%	3 = 45 - 49%
7 = 72 - 79%	2 = 26 - 44%
6 = 65 - 71%	1 = 0 - 25%
5 = 57 - 64%	

NOTE: Except for the adjustment of the raw grades of assignments or exams, grades are not changed. Moreover, the final grades are not determined with reference to any curve. As well, at any point of time the student may find out exactly where he/she stands (compared with his/her goal).

COURSE OUTLINE:

- I. Introduction and Review: (Mainly self-study)
 1. Economic Models Ch. 1
 2. Economic Review: The Market (Demand & Supply) Ch. 2
 3. Mathematical Review: Function & Differentiation

II.	<u>The Theory of Consumer Behaviour:</u>	
1.	Resource Constraints and Preference	Ch. 3
2.	Consumer Behaviour and Individual Demand	Ch. 4
3.	Utility Maximization II: Two-Good Case	
4.	Mathematical Review II: Unconstrained Maximization (Minimization), Lagrangian Method.	
5.	Utility Maximization II: The n-Good Case. (Substitution Methods)	
6.	Market Demand and Elasticity	Ch. 5
III.	<u>Theory of the Firm:</u>	
1.	The Firm and its Technology	Ch. 6
2.	Theory of Cost	Ch. 7
IV.	<u>Market Equilibrium for Final Product Under Various Structures</u>	
1.	Price - Takers: (competition)	Ch. 8
2.	Monopoly (including appendix)	Ch. 9
3.	Oligopoly Monopolistic Competition and Oligopoly	Ch. 10
V.	<u>Market Equilibrium for Inputs:</u>	
1.	Factor Markets, Price and Employment of Inputs	Ch. 12
2.	Factor Markets, Under Imperfect Competition	Ch. 13

VI. General Equilibrium:

- | | | |
|----|---|--------|
| 1. | Resource Allocation | Ch. 14 |
| 2. | Production Economic Efficiency | Ch. 15 |
| 3. | Public Goods | Ch. 16 |
| 4. | Intertemporal Choice and Technical Change | Ch. 17 |

***** Due to the limited time, we may not be able to cover all of the above, but we will try.**

NOTES:

1. Because economics is a study of human behaviour and heavily depends on theoretical framework than a body of information, it is important that attendance at lectures be regular. The best way to learn economics is to engage in the step by step development of the theory.
2. It is strongly advisable that the appropriate chapters are read prior to each lecture since this is generally considered to be an important and helpful approach to the study of economics.
3. The accompanying study guide provides an excellent means whereby students may test themselves about their understanding of text materials.
4. Failure to withdraw from the course before official withdrawal deadline may result in an "F" grade because a mark of 0% will be assigned to the incomplete portion of the course work.
5. Absence from class will not be accepted as a legitimate reason for failure to submit an assignment or to attend an exam on time.
6. Students are encouraged to contact the instructor regarding any questions pertaining to course materials, or their performance in the course. Remember that your instructor is here to help you learn, not to make things hard for you. It is a great pleasure to see you in the office for consultation and discussion whenever you fill the need

☉ **BEST WISHES** ☉
