**Course Description:**

This course focuses on the study of Psychology in Education. If one is to apply psychological principles to educational settings one must have a solid understanding of these principles. Psychological principles help teachers better understand their educational settings and their impact on teachers and learners. The field of Educational Psychology is concerned with the application of knowledge and the generation of knowledge. Educational Psychology is also concerned with the development of new theories to describe behaviours in educational settings and existing psychological theories can provide a base for understanding the behaviour and the setting.
