

DEPARTMENT OF NURSING EDUCATION & HEALTH STUDIES

COURSE OUTLINE: Fall 2022

HC 1010: HCA Role and Responsibility - 3 (4-0-0) 45 Hours/12 Weeks

Northwestern Polytechnic respectfully acknowledges that we are located on Treaty 8 territory, the traditional homeland and gathering place for many diverse Indigenous peoples. We are honoured to be on the ancestral lands of the Cree, Dene/Beaver and Métis, whose histories, languages, and cultures continue to influence our vibrant community. We are grateful to have the opportunity to work, learn, and live on this land.

CALENDAR DESCRIPTION:

During this course, you will focus on the role and responsibilities of a health care aide working in a variety of employment settings. The focus of this course is to share information that will result in safe, ethical, and respectful care based on the needs of the client. Care that meets these standards is known as person-centred care. To meet the goal of person-centred care, the health care aide must be familiar with the provincial legislation that guides safe, ethical, and personalized care. In addition, knowledge of how to work as part of a health-care team is essential, as is the ability to follow your employer's policy and procedures and your job description. The HCA is responsible for identifying, managing, and preventing potential environmental hazards in facilities and community-based settings and focusing on the client's safety as well as your own safety in different settings.

PREREQUISITE(S)COREQUISITE:

HC 1020, HC1030, HC 1040

DELIVERY MODE(S):

ADDITIONAL HCA PROVINCIAL CURRICULUM COURSE RESOURCES

Nearly all of the courses in the HCA I Curriculum have “references” at the end of each module with direct links for resources that can be accessed by learners or instructors. It is not the role of this Instructor Guide to monitor the accessibility of the website links listed in the references for each course.

If instructors have the Internet available in the classroom, they may wish to link directly to some of the listed references. Learners who have access to the Internet may wish to do further research as a learning enhancement activity. For these learners, it is important that the “source” of the information be obtained.

College libraries have many resources and librarians who can possibly help with journal articles or appropriate audio-visual materials.

There are many federal and provincial government-sponsored websites with current information related to the services provided by HCAs:

- Health Canada
- Government of Alberta
- Alberta Health Services
- Alberta Seniors and Community Supports
- Alberta Continuing Care Association
- Food Safe Alberta

COURSE OBJECTIVES:

1. Examine the health care aide role, responsibilities, and competencies within Alberta and the Canadian health-care system and the applicable government legislation, standards, and employer policies and procedures that govern the health care aide profession.
2. Describe the concepts of person-centred care, holistic health, illness and disability, and the effects of determinants of health on individuals and communities.
3. Explain the health care aide role when delivering person-centred care (considering the client's needs, rights, preferences, and willingness to participate in care) across acute (including mental health) and continuing care (home care, long-term care, and supportive living) settings.
4. Examine the attitudes and behaviours that demonstrate professionalism and accountability of the

- health care aide's actions and apply health-care ethics within the role of the health care aide.
5. Recognize the importance of continuing competence through professional development such as continuing education and digital literacy using feedback and self-reflection to improve health care aide competencies.
 6. Examine the health care aide role and responsibilities when applying the person-centred care principles to enhance, advocate, and maintain quality of life of a client in a collaborative team environment.
 7. Describe the importance of the health care aide role, responsibilities, and skills within the collaborative care team and the care planning process in the health-care environment.
 8. Describe the environmental hazards, infection prevention and control principles, and hazard assessments in the health-care environment.
 9. Describe the strategies to promote client safety and prevent falls in acute and continuing care (home care, long-term care, and supportive living) settings.
 10. Demonstrate the principles of infection prevention and control and safe body mechanics using evidence-informed practices to promote personal and client safety.
