

INTRODUCTION TO MATH 0115

This course is divided into 10 separate units called modules. The instructions are given in the modules along with several examples and exercises. Study the instructions and work through the examples before starting the exercise. The answers for the exercises are given at the end of the module. Check your work often. The key to success in working with modules is to ask questions whenever you have difficulty understanding the instructions, the examples or the exercises. Do not hesitate to ask for help.

After each module you must write a post-test. A passing mark of 60% is required on the post-test before continuing on to the next module. Students unable to attain this mark must review the material and rewrite the test to continue.

The first test mark for each module will count 3% towards the final grade. On a prescribed date, halfway through the semester, all students will be required to write a 50 minute midterm which will cover the first 5 modules. Any unwritten test before the midterm date will be given a grade of zero as the first test mark.

Upon completion of all modules, you will write a 3 hour final exam. Attached is the recommended test date for each module as well as the compulsory date for the midterm.

Your final mark is determined by:

10 module test	30%
Midterm	20%
Final Exam	50%

You will find a calculator, with the following functions, helpful in this course:

$EXP, \sqrt{x}, \sin, \cos, \tan, y^x, \pi, \%$

MATH 0115 - Module Schedule - Fall 1993

<u>MODULE</u>	<u>TOPIC/DESCRIPTION</u>	<u>RECOMMENDED TIME/TEST DATE</u>	
1	Fractions and Decimals - review fractions, decimals and percent	2 Weeks	Sept 20
2	Insurance - life and automobile insurance - premiums and cash value	1 Week	Sept 27
3	Discounts - trade discounts, discount series - cash discounts	1 1/2 Weeks	Oct 6
4	Markup and Markdown - selling price	1 1/2 Weeks	Oct 18
5	Consumer Credit	1 Week	Oct 25
	MIDTERM EXAM	1 HOUR	OCT 28
6	Algebraic Terms - four basic operations	1 1/2 Weeks	Nov 8
7	Equations	1 Week	Nov 15
8	Language of Algebra - writing algebraic expressions - writing algebraic equations - word problems	1 Week	Nov 22
9	Geometry - perimeter, area and volume	1 Week	Nov 29
10	Trigonometry - Pythagorean Theorem - sin, cos and tan	2 Weeks	Dec 10
	FINAL EXAM	3 HOURS	T.B.A.
