COURSE OBJECTIVES: This course is designed to help develop a greater understanding of music, and to help you become a more active listener. We will explore specific features of music, and listen to a variety of masterpieces and lesser-known works. Aspects of performance will be discussed, particularly in relation to videos you will see in class. The beginning section of the course will focus on music fundamentals and terminology so that we can discuss what we are hearing throughout the rest of the semester. We will look at music in its cultural context, examining it in relation to other arts and non-musical historical events that helped shape the music, and becoming familiar with how the sounds we hear have changed over the centuries. Listening to music will be a central element of the course, and will be part of the quizzes and exams.

LEARNING OUTCOMES: Upon successful completion of this course, students will have developed listening skills to identify distinctive elements of a variety of musical idioms and pieces, and be able to describe them using fundamental musical terminology. Students will be able to describe musical forms, and explain their uses. Students will be able to describe the development of the Western Art Music tradition from the Middle Ages onward, and explain the contributions that composers and other actors have made.
