COURSE

DESCRIPTION: This course introduces the key accounting principles and concepts, the accounting cycle, financial statement preparation and analysis for incorporated and unincorporated service and merchandising companies. Cash control, inventories, receivables and plant and equipment will also be covered.

COURSE

OBJECTIVE: Today's dynamic, competitive and continually changing business world has increased the requirement for the use of computers in the accounting system of many organizations. Computers are needed to keep track of financial activities and to summarize these activities in a manner that is useful to decision-makers both internal and external.

The main objectives of this course are to equip the student with basic understanding of accounting systems and to acquaint them with various aspects of the business world so that they will be better prepared to work in a computerized accounting environment.

Text problems and selected problems and cases will be used in the course.

EVALUATION: The final course mark is determined from the following:

Chapter Quizzes:	60%
Job Success Skills:	10%
Final exam:	30%
