PHYSICS 0110
(PC 0110)

B. Woodall

"Physics is the branch of science that involves the study of physical phenomena in order to establish patterns. Physicists investigate everything from atoms to galaxies, from toys to toasters, and from music to plumbing. They study the relationships between and energy, particles and waves."

(Physics Principles and Problems page 3)

This is an introductory Physics course which when completed will allow you to take further Physics courses. The course is mainly chapters 1 to 14 of Physics, Principles and Problems.
