Introduction to Applied Statistics
Fall 1999

SEP 06 2000

Grande Prairie Regional College

ROOM:	Lecture:	ST1510 A2	J 227	MW	10:00 - 11:20
		ST1510 B2	J 201	MW	13:00 - 14:20
	Lab:	ST1510 AL1	A301	Tues	14:30 - 16:20
		ST1510 AL2	A301	Thur	14:30 - 16:20
		ST1510 BL1	J 101	Fri	8:30 - 10:20
		ST1510 BL2	J 101	Fri	8:30 - 10:20

INSTRUCTORS: Dr. Eric Chislett, C409, ph. 2003
Mr. Tom Kaip, J212, ph. 2963

TEXT: *The Basic Practice of Statistics*, by D.S. Moore
Study Guide for Moore's The Basic Practice of Statistics
Data Analysis using Excel, by Michael Middleton

ASSESSMENT: Your final grade will be determined in the following manner:

Assignments	10%	
Lab Reports	20%	
Midterm Exam	20%	Wed./Thur., Oct. 13/14
Lab Exam	20%	Nov. 29 - Dec. 3
Final Exam	30%	2 hrs.

EXAMS: Exams will be closed book. A hand calculator will be necessary.
The formula sheet and tables as given in the textbook will be
copied and be given to you for the exams.

MISSED EXAMS: There is no make-up exam for the midterm or lab exam.
Students who miss them for a valid reason, such as illness,
will have the weight transferred to the Final Exam. Students who
miss the Final Exam must apply for a deferred exam through
the registrars office.

Statistics 1510 is an introductory statistics course focusing on statistical reasoning and data analyses. Mathematical theory is kept to a minimum. Students have access to a computer lab and so are able to work with a variety of data sets. You will be taught in the labs how to use the statistical part of the spreadsheet EXCEL and you will learn how to make proper lab reports.

The following course outline is based on the text *The Basic Practice of Statistics*, by D.S. Moore

PART I	Understanding Data	Chapters 1-3
PART II	Understanding Inference	Chapters 4-7
PART III	Topics in Inference	Chapters 8 and 10
NOTE:	Sections 4.6, 5.4 & 6.3 and Chapter 9 are omitted.	

Chapter	Approximate Lecture Time	Summary
1	1 hr 4.5	<u>Introduction</u> <u>Examining Distributions</u> : displaying distributions with graphs, describing distributions with numbers, the normal distribution.
2	4.5	<u>Examining Relationships</u> : scatterplots, correlation, least-squares regression, interpreting regression and correlation, relations in categorical data.
3	3	<u>Producing data</u> : designing samples, designing experiments.
4	5	<u>Sampling Distributions and Probability</u> : sampling distributions, probability distributions, sample proportions, the binomial distributions, sample means.
5	3	<u>Introduction to Inference</u> : Estimating with confidence, tests of significance, using significance tests.
6	4	<u>Inference for Distributions</u> : Inference for the mean of a population, comparing two means.
7	4	<u>Inference for Proportion</u> : inference for a population proportion, comparing two proportions.
10	4	<u>Inference for Regression</u> : inference about the model inference about prediction, checking assumptions.
8	3	<u>Inference for Two-Way Tables</u> : two-way tables, the Chi-Square test.
Total	36	

STATISTICS 1510 A2/B2
HOMEWORK ASSIGNMENTS
Fall 1999

There are 11 homework assignments for this course (only your best 10 will be counted). Assignments are given below, with the first 10 being problems from the text and the number 11 attached. They are due on Fridays as indicated.

NO LATE ASSIGNMENTS WILL BE ACCEPTED.

Solutions to these assignments will be posted on the second floor, J-wing on the Monday morning following the due date.

FORMAT OF ASSIGNMENTS:

1. The first page will contain ONLY your Name, I.D., Course no. & Section, Assignment no., Date, and Instructors Name.
2. Questions must be submitted in the same order as listed.
3. All pages must be stapled together. (paper clips, folded corners, etc. are not acceptable)
4. Use a ruler when constructing graphs and tables, and label axes of graphs.

ASSIGNMENT SCHEDULE:

No.	Due Date	Assigned problems (from text)
1	Sept 17	1.16, 1.66
2	Sept 24	1.46, 1.52
3	Oct 1	2.6, 2.42
4	Oct 8	3.20, 3.24
5	Oct 22	4.32, 4.40
6	Oct 29	4.46, 4.70
7	Nov 5	5.12, 5.46
8	Nov 10 or 12	6.16, 6.66
9	Nov 19	7.8, 7.14
10	Nov 26	7.24, 10.22 (for d, plot the residuals)
11	Dec 3	Will be handed out in class

STATISTICS 1510 A2/B2
RECOMMENDED PROBLEMS
Fall 1999

Because the Study Guide for Moore's textbook is now included with the text itself, it is not necessary to assign specific problems for you to complete. Rather the Study Guide contains detailed solutions to many problems and you are recommended to complete as many as possible or almost all of these problems. If you have problems with or want solutions to any of the other problems please see your instructor.

Do not assume that completing the problems assigned to be handed in for grading will be sufficient for understanding the material in this course and successfully completing the course.

STATISTICS 1510 A2/B2
LABORATORY PROJECTS
Fall 1999

The Computer Labs in Statistics 1510 are designed so that you can gain experience working with realistic data sets, familiarize yourself with the use of a computer for statistical analysis, and to help you understand the course material.

This term we are using a spreadsheet software package in the labs, Microsoft EXCEL, instead of a dedicated statistics program.

EXCEL has advantages and disadvantages. The advantages are obvious; it is a popular program that many of you already have on a home computer, it is fairly easy to learn, and it is a common tool in business, in industry, and in home environments. It can also be used as a word processing package.

The disadvantages are less obvious. It is not as statistically powerful (and in some cases not as easy to use) as software specifically designed for statistical analysis. When professional statisticians are brought data in EXCEL format for consulting work, they will convert it so that it can be analyzed in a dedicated system. If you wish to be a statistician you will take further statistics courses which use dedicated statistics packages.

There are some (elementary) statistical routines that EXCEL cannot do for you. No software package is perfect.

Completing Labs:

There are many computer rooms throughout the college, third floor A-wing, J101, and the Library, that are open daily and have EXCEL on them. Schedules of when each lab is available for general use is on the doors.

You must attend all labs as scheduled and you will complete the lab assignment and submit it during the scheduled time.

You will need one 3 1/2 disk to save your work from week to week. Some later labs use data from earlier labs.

Submitting Lab Reports:

Lab Reports are to be submitted at the completion of the lab.

Lab Reports must be in printed form. Remember to keep a back-up in either print or disk format.

STATISTICS 1510 A2/B2
LABORATORY PROJECTS
Fall 1999

Lab Topics:

There are 11 scheduled lab periods this term. Formal Lab Reports are to be submitted for grading for Labs 3 through 10.

Week ending:

Sept. 17	Lab 1	Introduction to Excel and Excel Add-Ins
Sept. 24	Lab 2	Formatting Output and Frequency Distributions
Oct. 1	Lab 3	Data Descriptions
Oct. 8	Lab 4	Approximate normality checks
Oct. 22	Lab 5	Correlation and Least-Squares Regression
Oct. 29	Lab 6	Time Series and Sampling Distributions
Nov. 5	Lab 7	Correlation and Sampling Distributions
Nov. 19	Lab 8	Confidence Intervals and Hypothesis Testing
Nov. 26	Lab 9	Linear Regression
Dec. 3	Lab 10	Lab Exam

Due Dates and Times

Lab Reports are to be submitted at the end of the lab period. The first report to be submitted is due the week ending Friday, Sept. 24.

NO LATE LABS WILL BE ACCEPTED.

FORMAT OF LABS:

1. Lab reports will include complete answers to the questions.
2. Questions are to appear in order. It is your responsibility to format your pages so as to present a properly written report. Label all answers as you would if you were hand-writing the submission. (Number all questions and label your answers so that they can be easily identified.)
3. Each page will have a heading which will include your name, ID number, date, course and section, and lab number and title. This header must be in **BOLD** and **LARGER FONT**, as per the sample of Lab #2.
4. All pages must be stapled together (paper clips, folded corners, etc., are not acceptable). All reports should be two or three pages long.
5. A sample lab report, for Lab #2, will be given in the second lab session.
