PREREQUISITE(S)/COREQUISITE: BI1070

REQUIRED TEXT/RESOURCE MATERIALS:

Moyes, C.D. and P.M. Schult, 2008, Principles of Animal Physiology, Pearson/Benjamin Cummings, 754pp (Suggested but not required)

CALENDAR DESCRIPTION:

Endocrinology, immunology and neural, sensory, motor and reproductive physiology are covered. Examples from vertebrates and invertebrates are included.

CREDIT/CONTACT HOURS: 3 (3-1-0)

DELIVERY MODE(S): Lecture and seminar

OBJECTIVES (OPTIONAL):

Communication among cells, coordination and body defense are explored in this course. Topics include the physiology of the nervous, sensory, motor, muscle, endocrine, reproductive and immune systems. Since physiological diversity in animals

seems to be a property of nature, examples are used from vertebrates and invertebrates. The approach taken in this course is to view physiological adaptations from an ecological point of view and to look at the evolutionary forces that resulted in these adaptations.

We will emphasize the integrative nature of physiology and try to place each system into its environmental framework. An understanding of cellular and molecular physiology is crucial. While we look at each system, the question we are addressing is how different animals use very similar building blocks to construct unique physiological systems that help them meet the challenges imposed by their environments.

TRANSFERABILITY: UA, UC, UL, AU, AF, CUC, KUC

** Grade of D or D+ may not be acceptable for transfer to other post-secondary institutions. Students are cautioned that it is their responsibility to contact the receiving institutions to ensure transferability

STUDENT RESPONSIBILITIES:

Since participation in lectures and completion of assignments are important components of this course, students will serve their best interests by regular attendance at both lectures and seminar sessions. Those who choose not to attend must assume whatever risks are involved.

The objective of the seminars is to clarify information that has been presented in class during the previous week. Students are advised to review their notes prior to each seminar. Quizzes may be given during the seminar period.
